Project Description

Please specify the research theme(s) being addressed including the estimated percentage effort in each theme (rounded to 5%)

Physical distribution, dispersion, and dilution of petroleum (oil and gas), its constituents, and associated contaminants (e.g., dispersants) under the action of physical oceanographic processes, air-sea interactions, and tropical storms. *

0% ▼

Chemical evolution and biological degradation of the petroleum/dispersant systems and subsequent interaction with coastal, open-ocean, and deep-water ecosystems. *

0% ▼

Environmental effects of the petroleum/dispersant system on the sea floor, water column, coastal waters, beach sediments, wetlands, marshes, and organisms; and the science of ecosystem recovery. *

0% ▼

Technology developments for improved response, mitigation, detection, characterization, and remediation associated with oil spills and accompanying releases of gas. *

0% ▼

Impact of oil spills on public health including behavioral, socioeconomic, environmental risk assessment, community capacity and other population health considerations and issues. *

0% ▼

Total Percentage Entered *

This total must equal 100 percent before proceeding.

0

Project Summary *

Enter a brief summary (no more than 5000 characters) of your proposed project.
